Agricultural Chemical Container Recycling Made Easy for the Midwest USA

GPS is the ACRC contractor for the 15 Midwest states as of January 1, 2017. This industry subsidized program provides **free recycling** of triple rinsed plastic plastic packaging 55 gallons or smaller (acrecycle.org). Our container collection program takes the work and confusion out of properly recycling used plastic containers.

Leave the work to us.

We have crews that will come to you and process your material on-site. In fact, we have tripled our fleet of mobile equipment to provide three times the customer service as before.

You can count on consistent, convenient collection and recycling of your Ag Chemical plastic.

Setting up a pick up

To set up a pickup call 563-942-0391 or email us at pickup@gpsagrecycle.com or visit our website. You can also see where we are going to be on any given week on our service schedule page.
