Demonstration, Tips on preparing for the FAA 137 certification. - Jeremy Williams, American  
Drone

11:30 Lunch:

12:00 In-field Demonstrations of UAS Operations and Applications

3:00 Adjourn

Wind, rain, snow, or a host of other weather conditions may be a limiting factor in how much (if any) time is spent in field demonstrations and remote pilot operations.

Due to a limited number of desktop simulators and quadcopter drones, **attendance will be limited to the first 10 registrations for each program.** Registration includes all classroom and field demonstrations, course materials, and lunches. Students are responsible for their own travel, food other than lunch, and lodging.

**The FAA Part 107 – Remote Pilot Certificate Test will be administered as a part of the Unmanned Aircraft Systems program. While all other testing (DATCP Commercial Applicator Certificate, DATCP Aerial Application Certificate, and FAA Part 137 – Dispensing Chemicals and Agricultural Products) will be discussed and some training provided, testing will need to be arranged on your own.**

The cost of the programs is \$975.

To register, please complete the information below. Registration can be completed online or can be returned to WABA, 2801 International Lane, Suite 105, Madison WI 53704.
